### SUMMARY:

Enthusiastic Full Stack Web Developer skilled in both front-end and back-end development. I create fast, responsive, and user-friendly web applications that go beyond client expectations. Proficient in using modern tools and techniques to solve problems, with a strong focus on quality and attention to detail. I work well in teams or on my own, and I'm always eager to learn and bring new ideas to the table.

### SKILLS:

- 
- Languages: Java , JavaScript
  - Frameworks/Libraries: ReactJs, NextJS , Spring boot , NodeJs , ExpressJs
  - Databases: PostgreSQL , MongoDB
  - Developer Tools: VS Code, IntelliJ Idea , Git, GitHub,
  - Technical Skills: Problem Solving, Debugging, RESTful APIs

### EXPERIENCE:

- FullStackDeveloper | FreeLancer | Fiverr April 2024 – Present

### PROJECTS:

---

1) **Final Year Project** – SmartSolution For Finance And Investment Optimization The proposed system recommends bussiness opportunities based on a customer's financial portfolio. It offers features like investment planning, budgeting, risk analysis, and market trend forecasting. The system empowers users with data-driven, personalized financial insights to make informed decisions and achieve their goals.

#### Core Features:

- Secure user authentication with multi-factor verification
- Customizable dashboard for income/expense tracking
- Investment analysis with risk forecasting
- Budget planning integrated with inflation predictions
- Exportable financial reports (PDF/CSV)

---

2) **phonebechpk.com**: Developed a modern and user-friendly platform for buying and selling mobile phones. The platform allows users to post and browse phone ads with ease, offering a seamless experience for both buyers and sellers.
